Connectors for flexible Low Loss RF Cables

Low Loss 195 – Low Loss 240 – Low Loss 400

Connectors for flexible Low Loss RF Cables

Telegärtner offers a wide range of RF connectors for various applications. They are used in mobile communication, industrial applications, test and measurement, transportation and broadcast applications. Due to more than 70 years of experience, our customers can rely on the high quality of German engineering and the excellent performance of the products in their application fields.

As during the last years, low loss cables gained more and more popularity compared to traditional RG-type cables due to their superior electrical characteristics, Telegärtner recognizes and acknowledges this tendency with providing connectors for low loss cables.

There are generally different ways of connecting connectors to cables: crimping, clamping, soldering or spring-loaded contacts. Telegärtner offers various solutions optimized for different applications.

Besides the wide range of RF connectors, Telegärtner also provides a considerable range of suitable coaxial low loss cables. Using this one-stop shopping option at Telegärtner makes your purchasing process even more efficient. The main use of low loss cables are all kinds of wireless applications, especially where RF-signals need to be transmitted between base stations and antennas with lowest loss. Applications may be for example Wireless Local Loop (WLL), (Industrial) WLAN or Professional/Land Mobile Radio (PMR/LMR).

Connector Types for Low Loss Cables

Crimp Types

- cost-efficient
- fast assembly
- special tools available

Clamp Types

- watertight IP67
- suitable for outdoor usage
- MIL standard available
- soldered inner conductor
- no special tools needed

Field Mount Types

- fast assembly
- no special tooling
- no soldering
- watertight IP67
- suitable for outdoor usage
- detachable/reusable

Panel Mount Types

- bulkhead and flange types available
- crimp and clamp types available
- bulkhead types with panel sealing

Typical Structure of Low Loss Cables

Benefits of Low Loss Cables compared to RG-Types

Popular Low Loss Cable Types

Cable Description	Ø Inner Conductor	Ø Dielectric	Ø Outer Conductor	Outer Ø	Insertion Loss (dB/100 m)				
					1 GHz	2 GHz	3 GHz	4 GHz	5 GHz
Low Loss 100	0.46 mm	1.52 mm	2.11 mm	2.79 mm	83	120	148	173	194
Low Loss 195	0.95 mm	2.8 mm	3.4 mm	5.0 mm	40	57	70	81	91
Low Loss 240	1.4 mm	3.8 mm	4.4 mm	6.1 mm	26	38	47	55	62
Low Loss 400	2.74 mm	7.24 mm	8.2 mm	10.3 mm	13.6	20	25	29	32

Further cable sizes on demand and in the catalogue.

Different Terms in Low Loss Cable Designation

Flex Types	Inner conductor stranded instead of solid	ZH	Jacket is free of halogens (zero halogens)
FR	Flame retardant jacket	NC	Non-corrosive gas formation
LS	Low formation of smoke	UL	Approved by Underwriters Laboratories

More Customised: assembling RF cables online

Do you want to assemble RF cables with coaxial connectors individually and add strain relief, labelling and cable length according to your requirements? Then the COAX configurator developed by Telegärtner is just what you need:

... **simple**, and is available to you around the clock

... **fast**, and allows you to configure your customised assembly with just a few clicks, thanks to a logical and easy-to-understand user-guidance

... **user-orientated**, and offers you exactly the information you require in order to configure your individual cable assembly

User-friendly input mask ...

... and creation of a clear specification (PDF)

⇒ for individually assembled RF cables
